

**MINUTES OF THE TOWN OF CHESHIRE WATER POLLUTION CONTROL
AUTHORITY REGULAR MEETING HELD ON WEDNESDAY, NOVEMBER 28, 2018
AT 7:30 P.M. IN COUNCIL CHAMBERS, TOWN HALL, 84 SOUTH MAIN STREET,
CHESHIRE CT 06410.**

Present

John Perrotti, Chairman; Steve Carroll, Vice Chairman; Tom Scannell, James Sima,
James Urbano, Zack Wellburn.

Absent: Aboud Abdelghani

Staff: Town Engineer Walter Gancarz

PLEDGE OF ALLEGIANCE

The Group Pledged Allegiance to the Flag

Chairman Perrotti read the emergency notification into the record.

ROLL CALL

Chairman Perrotti called the meeting to order at 7:30 p.m.

The clerk called the roll and a quorum was determined to be present.

1. PUBLIC COMMUNICATIONS

Chairman Perrotti read a "thank you" note from retired Supt. Dennis Dievert, in which he expressed his appreciation to the Authority and Town of Cheshire for naming the WWTP Administrative Building after him.

2. APPLICATIONS

a. 1953 and 2037 Highland Avenue

Attorney Anthony Fazzone represented the applicant, along with Ryan McEvoy, P.E. and Thomas Knowlton, P.E. from Milone & MacBroom.

Mr. Gancarz referred to his memo of November 20, 2018 on the Tri Star Development project in the north end of Cheshire. There was prior final approval for the W.S. Development project in 2014, for the areas to be serviced by a private pump station and force main to be tied into the town system at East Johnson Avenue and Route 10. The estimated flows are consistent with what was in the Facilities Plan. They include a base flow of 60,000 gpd from the 104 acre development plus an additional 50,000 gpd as a Special Flow, resulting in approximately 110,000 gpd, plus another 10,000 gpd for infiltration/inflow. The total proposed flow of 111,000 gpd is consistent with the estimated use from this area. This flow mimics the prior development (W.S.) which was permitted by the WPCA. The sheets that were submitted for the subject application lacked information on the sewers, pump stations, connection points, etc.

Chairman Perrotti explained the process for getting an application to go through feasibility and final approval. When there is a request for feasibility, the sewer

regulations require a letter for the plan, topographical map showing the limits of service with a proposed sewer plotted, and the limit of the entire tributary. This tells WPCA what is needed to take the application to the next step.

Attorney Fazzone represented the applicant. Mr. Fazzone stated that because of the detail WPCA went through with W.S. Development's application and final development approval, this applicant (Tri Star) did not submit some of the documents which are being presented at this meeting.

On the map, Mr. Fazzone pointed out I-691, Highland Avenue, the property site (outlined in yellow) and Ten Mile River. The site was previously approved for a retail center, outlet center...but due to the economy at the time, W.S. gave up on the plans to develop the site. Since then, the interest in the property has been for lesser sized uses and this type of use is reflected on the application where lower flows have been broken down. The proposed development would have restaurants, assisted living facility, hotel, age restricted living facility, and a residential component. The capacity that is broken down is reflective of the capacity for the W.S. Development project, using the same figures based on the square footages.

The Authority members were told by Mr. Fazzone that the applicant is in the process of preparing to file a subdivision application with the Planning and Zoning Commission (PZC). One of the PZC regulations requires WPCA feasibility approval before, or concurrently, with the subdivision application.

Mr. Fazzone referred to the preliminary subdivision plan. The plan calls for a road coming in opposite the entrance and exits for I-691 off Highland Avenue, building a road and cul de sac, extending the road coming out on Highland Avenue. This road is wider than a residential subdivision. The original W.S. approved plan showed a pump station, a force main (dotted line) coming across the river and into the road, out onto Highland Avenue, and connected (via gravity) to East Johnson Avenue.

The solid red line shows the gravity portions that get the sewage within the site down to the pump station. On the original plan the dotted line shows the force main coming up, and ultimately out to Highland Avenue, which is the same as the subject proposal.

Elevations are the same in terms of the proposal; the property lays out differently; the pump station is at 140 elevation; and it will get to 180 elevation where it comes under the bridge.

Mr. Fazzone said he reviewed with the applicant the conditions which were placed on the final development approval given by the Authority, and the applicant is aware of these conditions. This includes a private pump station built to town specifications.

This parcel of property is in the Interchange Zone (I-C zone). The I-C Zone was established in 1984; there are four quadrants of the intersection of Highland Avenue

and I-691; there has been no development in the zone; the zone had a 10 acre requirement which was recently changed with PZC authorizing lesser sized lots in the I-C zone. This change is what has attracted some of the interest in the zone.

Mr. Fazzone pointed out that that all the I-C zone and northwest quadrant has been recognized as important to the economic development of the town.

Mr. Fazzone cited the preamble of the regulations, which talks about feasibility approval. It requires the applicant to show a sanitary sewer system capable of construction, and capable of connection to the town's sanitary sewer system. He said this project is being done substantially the same way as the plan by W.S. Development.

It was noted by Mr. Fazzone that in his memo, Mr. Gancarz talked about the applicant having some contact with the Town of Southington...and if Southington was willing to accept sewage from this property, it could be done by gravity. This would also be at a significantly lower cost. What is being proposed could be prohibitively expensive to sewer that side of I-691. According to Mr. Fazzone the applicant will continue the discussions with Southington, but would have to return to WPCA for involvement in any decision to sewer the project through Southington. In the meantime, the applicant wants to continue to proceed with a subdivision application, show interest of parties, and come in with a final design approval.

Chairman Perrotti stated the property is in a growth area and meets Cheshire's sewer regulations.

A question was raised by Mr. Carroll about one sewerage scheme being the same as the W.S. Development plan for final approval, and if there are significant changes.

Mr. McEvoy showed the 2014 approved plan, and said the intent of the sewer plan on the east side of the Ten Mile River for draining of the entire site was a gravity system brought over through a great fill over a stone arched culvert to the pump station and off site to Highland Avenue. According to Mr. McEvoy, the proposed plan has the same location of the pump station and sewer plan; everything drains towards the river; there is no bridge proposed; and it goes out to Highland Avenue and I-691 south.

The applicant is proposing a subdivision application to PZC, and Mr. Carroll asked if this is for development of the entire area that is mapped out at this meeting.

Attorney Fazzone stated the map shows everything. The applicant is applying for one area of development, about 56 acres, and the entire site is 110 acres.

Mr. Carroll asked about final approval and sewerage requirements only for the 56 acres or the entire 110 acres, or would the applicant be required to address everything in the subject application.

Chairman Perrotti said the pump station should be sized for the entire project.

Mr. Gancarz stated the 240 multi-family residential on the site is included in the quotes.

When the application gets to final design, Mr. Perrotti asked if the design would be required for the whole site or in phases. He also said the pump station and force main would have to be sized and capable for the whole process. The gravity collection system could be designed at a later point for the second phase, and would have to go through the same process.

It was noted by Mr. Carroll that the original plan with the pump station was for the entire project.

Mr. McEvoy said the sewer shed analysis determines the breadth of the area that could go to the pump station, including areas east of Highland Avenue and west of Dickerman Road. This would have to be considered in terms of the size of the pump station. The applicant is seeking feasibility for the properties on the east side of the river.

Mr. Sima talked about the West Main Street project. During this project, it was asked who would be doing the subdivision so there is no conflict of interest. He asked who the people are doing the subject project, and noted Cheshire has a conflict of interest statute.

In response, Attorney Fazzone said Tri-Star principals are Frank DeNatelli, Doug Calcagni and Paul Bowman.

Mr. Sima asked about the Plan of Conservation and Development (POCD) for the sewer treatment plant, and if it limited or assumed 110,000gpd flow for this one parcel...or was the number larger.

The allocations for the Facilities Plan estimates were cited by Mr. Gancarz. For the 104 acre parcel, it is 60,000 gpd, and 50,000gpd as special flow, for a total of about 110,000gpd. The application states 111,000gpd, and if it does not include anything west of the river there would be a significant increase beyond this number.

Attorney Fazzone stated the 110,000gpd flows did not include the housing development on the western side of the property.

Authority members considered this fact and said they thought the flow number was all encompassing.

It was clarified by Mr. Sima that none of Dickerman Road would come into play.

In 2014, Mr. McEvoy said the analysis of the potential sewer shed area could have been delivered to the pump station, including part of Dickerman Road. There was analysis done to see how many adjoining properties could reasonably tie in.

Attorney Fazzino met with Mr. Gancarz and thought the plan was for a total of 150,000gpd.

Stating he looked at the Facilities Plan, Mr. Gancarz said it was 66,000gpd plus 50,000gpd special flow in this area for a total of about 110,000gpd. Originally, the pump station was sized for east and west of the river.

With anticipated development west of the river, Mr. Sima asked if this matches up with the Facilities Plan and taking I&I into account for the number. He stated there must be valid numbers for WPCA to make a decision.

Mr. Scannell cited 31,780gpd for 140 homes plus 110,000gpd, which totals 143,000gpd.

With regard to the gpd flows, Mr. Gancarz said this needs to be addressed, and he will validate the flows from the Facilities Plan.

Mr. Carroll stated it seems the proposed plan is consistent with the Facilities Plan which was for 110,000gpd.

Mr. Perrotti commented on the need for validation of capacity and what is allocated.

Mr. McEvoy stated the plans for the project included potential for expansion to Highland Avenue for future connection.

With regard to the other half of the four quadrants on the north side of I-691 having another force main, Mr. Sima asked if this would be something in future expansion. He noted there would be a private pump station.

There was prior discussion on this, and Mr. Gancarz said the idea was to have a stub and the east side developer could connect into that at their own expense. At that time the pump station would be turned over to the town...it would be private up to that point.

Mr. Sima clarified that the size of the station would be adequate to take the flow, but the pumps would not be there at that point.

The flows must be verified and Mr. Gancarz's understanding is 105,000gpd for the whole property, and now the understanding is 110,000gpd envisioned from the Facilities Plan.

Chairman Perrotti informed Attorney Fazzone that WPCA has a special meeting scheduled for December 12th, and if the applicant is prepared, the subject application could be on the agenda.

Regarding the flow numbers, Mr. Gancarz said that, in theory, 110,000gpd would take up the entire development.

Mr. Sima asked if the capacity on East Johnson Avenue is sufficient to handle the flow.

This was looked at last time, and Mr. Gancarz said there is an interceptor there. The West Johnson pump station is at 25% capacity. Also, the previous flows must be addressed as well as existing flows and the west side flows going to Southington.

Regarding the flows going into Southington, Mr. Knowlton informed the WPCA there is a meeting next week with Southington representatives to talk about shared capacity, getting mapping and see if this is feasible.

There have been discussions with Southington and Mr. Fazzone said they are interested in looking into the possibility of shared capacity.

Mr. Fazzone advised there was an easement through an adjacent Southington residential development where sewer pipe could be installed into the Southington portion on the west side.

A request was made of the applicant for a "narrative" at the December 12th meeting, and Mr. Fazzone agreed to have this to Mr. Gancarz by December 7th.

The application was continued to the December 12th WPCA meeting.

3. PROJECTS

Mr. Gancarz informed the Authority members that he reviewed the invoices and recommends them for payment.

- a. **AECOM November invoice #2000136942 dated November 15, 2018 for West Johnson Pump Station in the amount of \$20,375.54.**

MOTION by Mr. Scannell; seconded by Mr. Carroll

MOVED that the WPCA approve the AECOM invoice #2000136942 dated 11/15/18 for West. Johnson Pump Station in the amount of \$20,375.54

VOTE The motion passed unanimously by those present.

- b. **DelRay Contracting November invoice #11 dated November 19, 2018 for West Johnson Pump Station in the amount of \$346,064.10.**

MOTION by Mr. Scannell; seconded by Mr. Carroll

MOVED that the WPCA approve DelRay Contracting Invoice #11 dated 11/19/18 for West. Johnson Pump Station in the amount of \$346,064.10.

VOTE The motion passed unanimously by those present.

- c. Paramount Construction November Invoice, Application #7, dated November 30, 2018 for Cook Hill Pump Station in the amount of \$48,115.60**

MOTION by Mr. Scannell; seconded by Mr. Carroll

MOVED that the WPCA approve Paramount Construction November Invoice, Application #7, dated 11/20/18 for Cook Hill Pump Station in the amount of \$48,115.60.

VOTE The motion passed unanimously by those present.

- d. Wright Pierce – no invoice submitted.**

4. Interim Superintendent's Report.

a. Status of Plant Operations.

Mr. Gancarz reported the plant is running well; flows were up in October; and they will be the same for November and December.

Superintendent Position – Mr. Gancarz stated this process was done earlier in the year with advertising for the position. Two final candidates were interviewed by the new Town Manager, who decided to defer the position. The Superintendent's position has been re-advertised; there were six (6) applicants including two (2) internal candidates. It is expected the Town Manager will select a new Plant Superintendent by the December WPCA meeting.

Electrician – this is a 30 hour per week position that was advertised; one application was received; the person was interviewed by Mr. Gancarz and Mr. Wellburn; but he did not meet the criteria and qualifications for the position. It was noted by Mr. Gancarz that if this were moved up to a full time, 40 hour per week position, there would be more applicants. This could be a consideration for the FY 19-20 PW Dept. budget.

5. Town Engineer's Report

a. Cook Hill Pump Station

The pump station is almost completed; it is coming out great and was completed on time and under budget; training will take place next week.

b. West Johnson Pump Station

Mr. Gancarz said the workmanship on this project is fine; it should have been completed in September; and be substantially completed by January, and the station is on bypass now. The company requested a time extension for completion of the project. Additional information was requested by WPCA which has not yet been received. There are damages of \$1,200 per day; running over time will increase the AECOM charges; this must be taken into account for payment by the contractor. The budget on the project is good, the contractor is moving quickly, and project is running under budget. No action was taken on the time extension request.

c. Dike Certification

More information on the certification will be forthcoming, and things are going okay.

d. PCB Reporting Plan at WPCP

No action.

6. NEW BUSINESS

a. Status of Rebuild of second belt filter press.

Mr. Gancarz reviewed the status of the second press rebuild. There was an allocation of \$365,000 in the capital budget, and the quote for the work is \$273,000. In December the manufacturer will take out the second belt filter press, rebuild it at the factory, and return and install the rebuilt press at the plant in March 2019.

b. Adoption of FY 2018-2019 Sewer Rates.

Chairman Perrotti confirmed the date of the public hearing on the sewer rates as Wednesday, December 12, 2018, 7:00 p.m. followed by a special WPCA meeting. The regular December meeting is scheduled for December 19, 2018.

Review of Sewer Rates – Mr. Gancarz prepared an analysis of rates from \$400 to \$415 for residential users, and reviewed the information with the Authority members. A copy of the analysis is attached to these minutes.

\$400 annual sewer rate – 4903 residential users; 151 senior users at set rate (\$320 to \$380); commercial users and CCI; estimated revenue \$3,829,427. The revenue loss from commercial users - \$55,669.99, and CCI - \$32,778.76.

\$405 annual sewer rate – Total revenue \$3,829,427; revenue loss from commercial users is \$46,128.80, and CCI revenue loss is \$21,119.36.

\$410 annual sewer rate – Total revenue \$3,829,427; revenue loss from commercial users is \$36,587.50 and CCI loss is \$9,458.96.

\$415 annual sewer rate – Total revenue \$3,829,427; revenue loss from commercial users is \$27,046.41 and CCI loss is \$2,199.44.

The break even rate is \$413.78 SFH fee; and \$4.11 for commercial rate.

It was pointed out by Chairman Perrotti that the WPCA cannot go over the \$415 annual sewer rate, which is \$15 more per year than the current \$400 rate. With a shortfall from the sewer user fees, the money must come from the WPCD reserve fund, and some of this fund is used for the CWF payment.

The Authority members discussed the things affecting the situation, such as reduction in revenue, continued revenue reduction due to lower CCI flows, less people using the system, the dry summer, CCI's significant infiltration capacity, lower flows.

Mr. Gancarz advised there is little communication between the Town and prison.

Chairman Perrotti stated he believes the flows will remain the same. He commented on the I&I problems at the prison facility.

The sewer user rates will be discussed at the public hearing and special meeting on December 12th.

c. Adoption of Meeting Dates for 2019.

In reviewing the meeting dates, Chairman Perrotti recommended the November 2019 meeting be changed to "**November 20, 2019.**" Authority members concurred with the recommendation.

MOTION by Mr. Perrotti; seconded by Mr. Scannell.

MOVED that the WPCA adopts the following meeting dates for 2019.

2019 – January 23; February 27; March 27; April 24; May 22; June 26; July 24; August 28; September 25; October 23; November 20; December 18; and January 22, 2020.

VOTE The motion passed unanimously by those present.

7. OLD BUSINESS

a. Other old business of the WPCA

Mr. Gancarz referred to change order #2 from AECOM for West Johnson Pump Station Rehabilitation. For the record, he cited the valid four items in this change order. The total financial impact is \$6,784. From a budget standpoint, Mr. Gancarz advised this project is in good shape and recommends payment. The total adjusted contract price is \$2,097,435.00.

MOTION by Mr. Carroll; seconded by Mr. Scannell.

MOVED that the WPCA approve the payment of AECOM Change Order #2 in the amount of \$6,784.

VOTE The motion passed unanimously by those present.

8. APPROVAL OF MINUTES – OCTOBER 24, 2018

MOTION by Mr. Scannell; seconded by Mr. Urbano.

MOVED that the WPCA approve and accept the minutes of October 24, 2018 subject to corrections, additions, deletions.

VOTE The motion passed unanimously by those present.

9. ADJOURNMENT

MOTION by Mr. Scannell; seconded by Mr. Urbano

MOVED to adjourn the meeting at 9:00 p.m.

VOTE The motion passed unanimously by those present.

Attest:

Marilyn W. Milton, Clerk

Change Order No. 2
November 26, 2018

TOWN: Town of Cheshire, Connecticut
CHANGE ORDER NO.: 2
CONTRACT: West Johnson Avenue Pump Station Rehabilitation
Contract No. 1617-23
OWNER & ADDRESS: Water Pollution Control Authority
Town Hall, 84 South Main Street
Cheshire, CT 06410
CONTRACTOR: Delray Contracting, Inc.
ADDRESS: 10 Nutmeg Drive
Ellington, CT 06029

In accordance with the terms of your Contract, you are hereby directed to proceed and comply with the changes noted herein from the Contract plans and specifications. Time for completion is not extended by this Change Order. Further, you agree that you shall not have or assert any claim for nor shall you be entitled to any additional compensation or damages over and above that included in this Change Order.

AMOUNT OF CHANGE ORDER

A lump sum amount of \$6,784.00, to furnish all labor, materials and equipment necessary to complete the work noted in the Description of Change below. This amount is for full and final compensation for the changes included herein. All other provisions of the Contract shall remain in force.

PAYMENT

Payment for work under this change order shall be made only when authorized in a monthly progress payment requisition.

DESCRIPTION OF CHANGE

Item 1 (PCO-7)

Upgrade the pump control programmable logic controller size to the next larger size. \$1,219.00

Item 2 (PCO-8)

Install new faucet into existing sink. \$756.00

AECOM

November 27, 2018

Water Pollution Control Authority
84 South Main Street
Cheshire, CT 06410
Attention: Mr. John Perrotti, Chairman

Subject: West Johnson Avenue Pump Station Rehabilitation
Contract 1617-23

Dear Authority Members:

Enclosed please find 5 copies of Change Order No. 2 for the subject project.

When approved, please return four executed copies for distribution.

If you should have any questions or require additional information, please feel free to call.

Very truly yours,

Jon R. Pearson
Vice President
AECOM

Change Order No. 2
November 26, 2018

Item 3 (PCO-9)

Provide additional wiring between ATC Panel and Gas Monitoring Control Panel. \$2,598.00

Item 4 (PCO-10)

Provide additional road trench paving thickness. \$2,211.00

BACKUP DATA

Item 1 (PCO-7)

- Delray "Proposed Change Order No. 7" dated September 20, 2018.

Item 2 (PCO-8)

- Delray "Proposed Change Order No. 8" dated October 9, 2018.

Item 3 (PCO-9)

- Delray "Proposed Change Order No. 9" dated October 18, 2018.

Item 4 (PCO-10)

- Delray "Proposed Change Order No. 10" dated November 2, 2018.

STATEMENT OF THE ENGINEER

Item 1 (PCO-7)

The specified controller was upgraded to the next larger size in order to accommodate the scheduled inputs and outputs.

Item 2 (PCO-8)

Sometime after the upgrade design was completed for the project, the existing faucet valve failed and the faucet was removed and not replaced. A new faucet and related plumbing was added to the contract to replace the faucet that had been previously removed.

Item 3 (PCO-9)

Additional conduit and wire was provided between the Gas Monitoring Control Panel and the Automatic Temperature Control (ATC) Panel to run fans at full speed if hazardous gases are detected.

Item 4 (PCO-10)

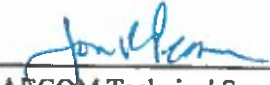

The trench pavement detail for work in West Johnson Avenue requires a total of 3-inches pavement thickness. During construction, it was determined that the existing pavement thickness was approximately 8 to 10-inches, and Delray was required to match the existing pavement thickness.
