V. Business

1. Discussion Re: Historic Resources Map for POCD

Ms. Pittsley explained how Google Maps could be used to determine the coordinates of most of the fifty historic sites listed in the draft of the historic resource material in the POCD. By providing the coordinates for each site, a map could be generated showing the location of these sites. Using GSI software will also enable the map maker to add icons to the site as well. For example, all historic churches would have the same icon, but a different number that corresponds to the legend.

The commissioners then reviewed most of the fifty sites and determined those that could be mapped.

It was also recommended that we attached the map of historic buildings generated a few years ago to the draft of the historic resources of the town and that a map of historic barns be generated for the draft report.

2. Other

There was no other business.
